Professional Summary

A highly analytical Software Engineer and Data Management Specialist (IUG, 2024 graduate) with a strong foundation in Information Management and over 2 years of experience in financial data entry and field monitoring. Beyond proficiency in SQL, MongoDB, and Full-Stack frameworks, I excel at transforming complex raw data into actionable insights to support humanitarian efforts in Gaza. I have a proven track record of maintaining 100% data accuracy in Al-Aseel financial systems and advanced Excel, ensuring the highest standards of data integrity and confidentiality. I am dedicated to optimizing data-driven decision-making and streamlining logistics workflows in high-pressure, fast-paced environments.

Technical Skills

_Frontend: HTML, CSS, JavaScript, React

_Backend:php,laravel

_Databases: SQL, MongoDB

_ High-accuracy Data Entry.

Fast Learner of Information Systems.

_ Advanced MS Excel & MS Word.

_ Ability to Work in a Team and Under Pressure.

_ Database Management and Organization.

_ Data Validation & Quality Checks.

_ Commitment to Confidentiality and Data Protection.

_ Data Analysis & Visualization

_Advanced MS Excel

_Digital Collection Tools

_Information Integrity

_Work Under Pressure

Work Experience,Online IT & Software Training

Field Monitor & Data Collector | RCF Foundation,Gaza Strip, Palestine | Jan 2025 – Dec 2025

- Coordinated field logistics and movement plans for data collection teams, ensuring efficient operations.

- Audited and verified field data using digital tools (KoboToolbox), ensuring high data integrity and accuracy.
- Managed and tracked field equipment and supplies, maintaining accurate inventory records.
- Prepared comprehensive movement reports and daily updates to streamline program activities.

Junior Accountant & Cashier | saqalla sweets,Gaza Strip, Palestine | Feb 2022 – oct 2023

- Managed financial records and accounts using the Al-Aseel Accounting System with zero error rates.
- Facilitated procurement processes by reviewing supplier invoices, purchase orders, and quotations.
- Conducted periodic physical inventory counts and reconciled stock discrepancies to ensure resource accountability.
- Maintained strong supplier relationships, ensuring cost-effective sourcing and timely delivery of supplies.

Software Development Intern | Jan 2025 – Apr 2025

- Developed small applications using programming languages such as HTML, CSS, JavaScript.
- Trained on diagnosing and resolving system and network issues.
- Practiced version control with Git and GitHub.

IT Support Training | May 2025 – Jul 2025

- Trained on diagnosing and resolving system and network issues.
- Installed and configured software and operating systems.

Software Development | Dec 2025 – Jan 2026

- Developed small applications using programming languages such as HTML, CSS, JavaScript, Responsive Web Design.
- Introduction to Back-End Concepts, Working with Git and development tools, Building practical web projects
- Practiced version control with Git and GitHub.

Professional Projects

- **E-Commerce Web App:** E-Commerce Web App Built full-stack app using Frontend,php and MongoDB. Implemented authentication, cart system, and REST APIs. Improved loading performance by optimizing API structure.
- **IoT Home Automation:** Controlled sensors via Arduino and mobile app integration.
- **Network Simulation:** Configured routing, VLANs, and firewall security using Cisco Packet Tracer.

Education

Bachelor of Software Engineering & IT — Islamic University | Graduated: 2024

Computer Engineering courses. Relevant coursework: Software Development, Networking, Database Management, Electronics.

Languages

- Arabic: Native
- English: Professional Working Proficiency

Achievements

- Completed multiple online courses on Udemy and Coursera in Software Development, IT Support, and Networking.
- Built and deployed personal projects demonstrating programming skills.
